Learning:

Understand and design a website sitemap for a student management portal.

Identify the relation between different web pages such as Login, Home, Profile, Result, Fees, Attendance, Course, Timetable, and Settings.

Create a clear navigation structure that allows users to move between different sections of the website.

Understand user authentication flow, including Login, Forgot Password, and Logout functionality.

Design a user-friendly interface structure using a wireframe/site map before developing the actual website.

Organize student-related information such as results, attendance, fees, course registration, and timetable into separate sections.

Understand basic UI/UX planning and how a sitemap helps in developing a structured website
